PROJECTS

InterviewManagement

(10/2023 - 11/2023)

| | |
|--------------------------------|---|
| Position | Full-stack developer |
| Description project | A website was created for the purpose of managing interview candidates within the company. It allows 3 main roles to be used which are recruiters. interviewer, and manager, in which each person will play a different role. The recruiter will take on the functions of job management, candidate management, creating interview schedules, and creating job proposals. The interviewer will interview the candidate and save the results on the application. When passing the interview round, the employer will create job proposals and the manager will take care of processing those offers. The website is built based on an Agile SCUMS process. |
| Your team size | 3 |
| Technology description | <ul style="list-style-type: none">• HTML/CSS, Javascript, Bootstrap 4, JQuery, SQL server• Springboot, Hibernate, thymeleaf• Java |
